this book examines how jihadist groups in sub saharan africa have managed to advance their extremist agenda and recruit new followers thanks to digital media fueled by the information revolution since the dawn of the 21st century this examination is based on a mixture of historical accounts contemporary descriptions case studies theoretical applications and an in depth applied study in the late chapters of the manuscript an important conclusion is that the progress of jihadism in sub saharan africa has been commensurate with the development and availability of digital media this book breaks new ground in three ways it is the first major academic work to devote most of its content exclusively to the use of digital media by jihadist groups in that region examples of jihadist digital media include social networking sites online instructional videos propaganda videos and online jihadist magazines among others secondly it provides detailed case studies of both well known african groups e g al shabaab boko haram and lesser known ones e g the allied democratic forces in the congo which have nevertheless wreaked so much damage lastly it is the first book to include an in depth thematic analysis of online jihadist magazines inspire dabi q rumiyah and gaidi mtaani on their content dedicated to sub saharan africa

the three waves of european research european cooperation and integration has continued to progress forward over the past five decades with an ever deepening impact on the member states the first wave of research into these processes concerned european integration the process of institution building and policy developments at the european union eu level the second wave on europeanization used integration as an explanatory factor in understanding domestic political change and continuity related to the eu what is now necessary is to link our understanding of these bottom up and top down processes of integration and europeanization in the eu this book argues that a third wave of research on the eu is needed to adequately understand the increased interconnectedness between the european and national political levels we posit that this third wave should be sensitive to the temporal

dimension of european integration and europeanization in particular we seek to link the processes of european integration and europeanization in a new way by asking the question how has europeanization affected current modes of integration and cooperation in the eu part i europeanization of the member states preparing the ground for the third wave the first part of the book concerns europeanization in order to fully understand the feedback of europeanization on cooperation and integration it is important to analyze how european integration has had an impact on member states in the first place in particular indirectly beyond the direct mechanism of compliance with european policies

much of the existing research on race and crime focuses on the manipulation of crime by political elites or the racially biased nature of crime policy in contrast lisa l miller here specifically focuses on political and socio legal institutions and actors that drive these developments and their relationship to the politics of race and poverty in particular the degree to which citizens at most risk of victimization primarily racial minorities and the poor play a role in the development of political responses to crime and violence miller begins her study by providing a detailed analysis of the narrow and often parochial nature of national and state crime politics drawing a sharp contrast to the active and intense local political mobilization on crime by racial minorities and the urban poor in doing so the perils of federalism illustrates the ways in which the structure of u s federalism has contributed to the absence of black and poor victims of violence from national policy responses to crime and how highly organized but narrowly focused interest groups such as the national rifle association have a disproportionate

influence in crime politics moreover it illustrates how the absence of these groups from the policy process at other levels promotes policy frames that are highly skewed in favor of police prosecutors and narrow citizen interests whose policy preferences often converge on increasing punishments for offenders ultimately the perils of federalism challenges the conventional wisdom about the advantages of federalization and explains the key disadvantages that local communities face in trying to change policy

To the Moon and Back (Arabic): A Journey Through Distance and Measurement

The phrase "to the moon and back" is a common idiom used to describe a very long distance, often emphasizing the vastness of space. But have you ever considered how we might express this in Arabic, a language with its own rich system of measurement and figurative speech? This article explores the intricacies of expressing this concept in Arabic, examining both literal and metaphorical approaches. We'll navigate the linguistic landscape, exploring units of measurement, idiomatic expressions, and the cultural context that shapes how we understand distance.

1. Understanding Arabic Units of Measurement

Arabic, like many languages, employs a variety of units to measure distance. While kilometers (كيلومتر, kilometr) are now commonly used, particularly in scientific and technical contexts, traditional units persist, especially in everyday speech. These include:

- Kilometer (كيلومتر):** The standard unit for long distances, borrowed from the international system of units (SI).
- Meter (متر):** A unit of length, one-thousandth of a kilometer.
- Centimeter (سنتيمتر):** One hundredth of a meter, frequently used for smaller measurements.
- Ancient Units:** Historically, Arabic used units like farasakh (فرسخ), roughly equivalent to 3-6 kilometers, often based on the distance a horse could travel in a day. This unit highlights the historical context of measuring distance relative to travel methods. To illustrate, imagine calculating the distance to the moon and back. The average distance to the moon is approximately 384,400 kilometers. "To the moon and back" would therefore be around 768,800 kilometers (٧٦٨,٨٠٠ كيلومتر).

2. Literal vs. Figurative Language in Expressing Distance

While we can use the literal kilometer calculation, Arabic, like any language, employs figurative language to convey meaning more vividly. Directly translating "to the moon and back" wouldn't be idiomatic. Instead, Arabic speakers might use phrases that emphasize extreme distance or effort. These phrases often rely on metaphors and hyperbole: مَسَافَةٌ طَوِيلَةٌ جِدًّا (masāfah ṭawīlah jiddan): This literally means "a very long distance," serving as a straightforward alternative. مَسِيرٌ طَوِيلٌ (masīr ṭawīl): Meaning "a long journey," this evokes the arduous nature of the distance. بَعِيدٌ كَالْقَمَرِ (ba'īd ka-l-qamar): Meaning "as far as the moon," this uses the moon as a point of reference for great distance. The choice of phrase depends on the context. If discussing a physical journey, a phrase referencing a long journey is more appropriate. If emphasizing the immensity of the effort, a hyperbole or metaphorical expression works best.

3. Cultural Nuances and Context

The way distance is perceived and expressed in Arabic is influenced by cultural factors. For instance, the emphasis on hospitality and familial ties means that the vast distances separating family members might be described with greater emotion than in cultures with more frequent geographical mobility. The deserts, historically prominent features of many Arab regions, might also implicitly shape the perception of vastness and distance.

4. Practical Application and Examples

Let's consider a few examples: Scenario 1 (Literal): "The rocket traveled to the moon and back, covering approximately 768,800 kilometers (٧٦٨,٨٠٠ كيلومتر)." Scenario 2 (Figurative): "He went through so much to get this done; it was a masīr ṭawīl (مَسِيرٌ طَوِيلٌ) – a long journey indeed."

Actionable Takeaways

Learn basic Arabic units of measurement for accurate communication. Understand the context to choose between literal and figurative language. Appreciate the cultural nuances that shape the perception and expression of distance in Arabic.

FAQs

1. Is there a direct Arabic equivalent of "to the moon and back"? No, there isn't a direct, idiomatic translation. Instead, Arabic speakers would utilize phrases that emphasize the immense distance or effort involved. 2. How do I choose the right phrase to express extreme distance? The best phrase depends on context. For scientific discussions, use kilometers. For everyday conversation emphasizing effort, use figurative language. 3. Are ancient units of measurement still used in modern Arabic? While less common than kilometers, they sometimes appear in literature, historical accounts, and informal settings. 4. How does the desert influence the perception of distance in Arabic culture? The vastness of the desert historically shaped the understanding of distance and the difficulty of travel. 5. Can I use "to the moon and back" literally in Arabic with a translation? While technically understandable with a translation, it wouldn't be idiomatic or natural-sounding. It's better to use native Arabic expressions of distance.
