the united states has been fighting wars constantly since invading afghanistan in 2001 this nonstop warfare is far less exceptional than it might seem the united states has been at war or has invaded other countries almost every year since independence in the united states of war david vine traces this pattern of bloody conflict from columbus s 1494 arrival in guantanamo bay through the 250 year expansion of a global us empire drawing on historical and firsthand anthropological research in fourteen countries and territories the united states of war demonstrates how us leaders across generations have locked the united states in a self perpetuating system of permanent war by constructing the world s largest ever collection of foreign military bases a global matrix that has made offensive interventionist wars more likely beyond exposing the profit making desires political interests racism and toxic masculinity underlying the country s relationship to war and empire the united states of war shows how the long history of u s military expansion shapes our daily lives from today s multi trillion dollar wars to the pervasiveness of violence and militarism in everyday u s life the book concludes by confronting the catastrophic toll of american wars which have left millions dead wounded and displaced while offering proposals for how we can end the fighting

the united states spearheaded the creation of many international organizations and treaties after

world war ii and maintains a strong record of compliance across several issue areas yet it also refuses to ratify major international conventions like the un convention on the law of the sea and the convention on the elimination of all forms of discrimination against women why does the united states often seem to support international law in one way while neglecting or even violating it in another the united states and international law paradoxes of support across contemporary issues analyzes the seemingly inconsistent u s relationship with international law by identifying five types of state support for international law leadership consent internalization compliance and enforcement each follows different logics and entails unique costs and incentives accordingly the fact that a state engages in one form of support does not presuppose that it will do so across the board the contributors to this volume examine how and why the united states has engaged in each form of support across twelve issue areas that are central to twentieth and twenty first century u s foreign policy conquest world courts war nuclear proliferation trade human rights war crimes torture targeted killing maritime law the environment and cybersecurity in addition to offering rich substantive discussions of u s foreign policy in each of these areas their findings reveal patterns across the u s relationship with international law that shed light on behavior that often seems paradoxical at best hypocritical at worst the results help us understand why the united states engages with international law as it does the legacies of the trump administration and what we should expect from the united states under the biden administration and beyond

unassuming but formidable american maritime insurers used their position at the pinnacle of global trade to shape the new nation the international information they gathered and the capital they generated enabled them to play central roles in state building and economic development during the revolution they helped the u s negotiate foreign loans sell state debts and establish a single national bank afterward they increased their influence by lending money to the federal government and to its citizens even as federal and state governments began to encroach on their domain maritime insurers adapted preserving their autonomy and authority through extensive involvement in the formation of commercial law leveraging their claims to unmatched expertise they operated free from government interference while simultaneously embedding themselves into the nation s institutional fabric by the early nineteenth century insurers were no longer just risk assessors they were nation builders and market makers deeply and imaginatively researched underwriters of the united states uses marine insurers to reveal a startlingly original story of risk money and power in the founding era

in this sweeping history of united states policy toward latin america lars schoultz shows that the united states has always perceived latin america as a fundamentally inferior neighbor unable to manage its affairs and stubbornly underdeveloped this perception of inferiority was apparent from the beginning john quincy adams who first established diplomatic relations with latin america believed that hispanics were lazy dirty nasty a parcel of hogs in the early nineteenth century ex president john adams declared that any effort to implant democracy in latin america was as absurd as similar plans would be to establish democracies among the birds beasts and fishes drawing on extraordinarily rich archival sources schoultz one of the country s foremost latin america scholars shows how these core beliefs have not changed for two centuries we have combined self interest with a civilizing mission a self abnegating effort by a superior people to help a substandard civilization overcome its defects william howard taft felt the way to accomplish this task was to knock their heads together until they should maintain peace while in 1959 cia director allen dulles warned that the new cuban officials had to be treated more or less like children schoultz shows that the policies pursued reflected these deeply held convictions while political correctness censors the expression of such sentiments today the actions of the united states continue to assume the political and cultural inferiority of latin america schoultz demonstrates that not until the united states perceives its southern neighbors as equals can it anticipate a constructive hemispheric alliance

in a campaign for state or local office these days you re as likely today to hear accusations that an opponent advanced obamacare or supported donald trump as you are to hear about issues affecting the state or local community this is because american political behavior has become substantially more nationalized american voters are far more engaged with and knowledgeable about what s happening in washington dc than in similar messages whether they are in the south the northeast or the midwest gone are the days when all politics was local with the increasingly united states daniel j hopkins explores this trend and its implications for the american political system the change is significant in part because it works against a key rationale of america s federalist system which was built on the assumption that citizens would be more strongly attached to their states and localities it also has profound implications for how voters are represented if voters are well informed about state politics for example the governor has an incentive to deliver what voters or at least a pivotal segment of them want but if voters are likely to back the same party in gubernatorial as in presidential elections irrespective of the governor s actions in office governors may instead come to see their ambitions as tethered more closely to their status in the national party

the united states has once again entered into a period of large external imbalances this time the current account deficit at nearly 6 percent of gdp in 2004 is much larger than in the last episode when the deficit peaked at about 3.5 percent of gdp in 1987 moreover the deficit is on track to become substantially larger over the next several years this study examines whether the large and growing current account deficit is a problem and if so how the problem can be solved a central policy conclusion of this study is that it is increasingly important that the united states reduce its external current account deficit this deficit is no longer benign as it arguably was in the late 1990s when it was financing high investment instead of high consumption and large government dissaving

although brazil and the united states have long regarded each other sympathetically relations between the two countries have been adversely affected by geographical distance language barriers and cultural indifference in this comprehensive overview joseph smith examines the history of brazil u s relations from the early nineteenth century to the present day with the exception of commerce notably the coffee trade there was relatively little contact between the countries during the nineteenth century a convergence of national interests took place during the first decade of the twentieth century and was exemplified in brazil s strategy of approximating its foreign policy to that pursued by the united states in return brazil expected economic gains and diplomatic support for its ambition to be the leading power in south america but u s leaders were cautious and self serving brazil was treated as a special ally according to smith but only at times of major crisis such as the two world wars as the twentieth century progressed friction developed over programs of u s financial assistance and efforts to deal with the threat of communism recently there have been disagreements over brazil s determination to take its rightful place as a global economic player and regional leader nonetheless history reveals that these two giant nations of the western hemisphere share national interests that they realize are best served by maintaining a friendly cooperative relationship

The Titans of the Trenches: Exploring the Great Powers of World War One

Imagine a world teetering on the brink, where a single spark could ignite a global conflagration. This was the Europe of 1914, a continent dominated by a handful of immensely powerful nations – the Great Powers – whose ambitions, rivalries, and alliances ultimately plunged the world into the horrors of World War One. This article will delve into the identities, strengths, and motivations of these giants, revealing how their interplay shaped the course of the war and, indeed, the 20th century.

I. The Central Powers: A Coalition Forged in Fear and Ambition

The Central Powers, initially a relatively loose alliance, formed the core of the opposing forces during the war. They included:

- Germany:** Arguably the most powerful of the Central Powers, Germany's rapid industrialization and militarization under Kaiser Wilhelm II made it a formidable force. Its powerful army and navy, combined with a burgeoning industrial capacity to produce war materials, were central to its ambitions of dominating Europe. This ambition, coupled with a belief in its inherent superiority, fueled its expansionist policies that ultimately contributed to the outbreak of war. Real-life application: Germany's sophisticated U-boat (submarine) warfare exemplifies its technological prowess and its willingness to engage in unrestricted submarine warfare, ultimately drawing the United States into the conflict.
- Austro-Hungarian Empire:** A vast, multi-ethnic empire, Austria-Hungary was plagued by internal tensions and nationalist movements threatening its very existence. Its alliance with Germany offered a crucial support system against these internal threats and provided a powerful military partner. However, Austria-Hungary's internal weaknesses, coupled with its inefficient military bureaucracy, proved a significant liability during the war. Real-life application: Austria-Hungary's assassination of Archduke Franz Ferdinand, the heir to the Austrian throne, served as the immediate trigger for World War I.
- Ottoman Empire:** The "Sick Man of Europe," the once mighty Ottoman Empire was in decline but

still controlled significant territory in the Middle East and the Balkans. Its alliance with the Central Powers offered a chance to regain lost prestige and territory. The Ottomans' participation significantly impacted the war in the Middle East, opening up new fronts and influencing the political landscape of the region for decades to come. Real-life application: The Armenian Genocide, a horrific act committed by the Ottoman government against its Armenian population, stands as a dark stain on the war and a testament to the brutality of the conflict. Bulgaria & Others: Bulgaria joined the Central Powers later, motivated by territorial ambitions in the Balkans. Other smaller nations also allied with the Central Powers, contributing troops and resources, albeit on a smaller scale.

II. The Allied Powers: A Diverse Coalition United Against Aggression

The Allied Powers, initially a more solidified alliance than the Central Powers, represented a broader spectrum of nations united (at least initially) by a common goal: to contain German expansionism. This group included: France: Seeking revenge for its humiliating defeat in the Franco-Prussian War of 1870-71, France was eager to reclaim lost territory (Alsace-Lorraine) and curb German power. France's army, though initially outmatched by Germany, displayed resilience and determination throughout the war. Real-life application: The Battle of Verdun, a brutal and prolonged battle between France and Germany, showcased the immense human cost of trench warfare. Great Britain: A global empire with a powerful navy, Britain entered the war primarily to protect its interests and prevent German dominance of Europe. Britain's naval superiority played a crucial role in maintaining Allied supply lines and preventing a German invasion of Britain. Real-life application: The Battle of Jutland, a major naval battle between the British and German fleets, demonstrated the importance of naval power in the war. Russia: The vast Russian Empire, despite its internal weaknesses and autocratic rule, possessed a massive army that could be deployed on the Eastern Front. Initially, Russia's entry dramatically shifted the balance of power against the Central Powers. However, Russia's internal instability and subsequent revolution significantly weakened its war effort. Real-life application: The disastrous Russian performance in the war led to the February and October Revolutions, culminating in the overthrow of the Tsar and the establishment of the Soviet Union. Italy, Japan, USA & Others: Other nations, including Italy, Japan, and ultimately the United States, joined the Allied Powers, adding substantial military and economic strength to the cause. Their involvement significantly

influenced the war's outcome.

III. The Legacy of the Great Powers in WWI

The Great Powers of World War One were not merely participants; they shaped the very nature of the conflict and its aftermath. Their rivalries, alliances, and military strategies dictated the course of the war, determining the battlefronts, the weapons used, and the immense human cost. The war's conclusion dramatically reshaped the political map of Europe, leading to the collapse of empires, the creation of new nations, and the rise of new global power dynamics. The Treaty of Versailles, though intended to secure lasting peace, instead sowed the seeds of future conflict by imposing harsh penalties on Germany and creating conditions for resentment and instability.

Reflective Summary:

World War One was a conflict driven by the ambitions, fears, and miscalculations of the Great Powers. Their alliances, military capabilities, and national interests shaped the course of the war, resulting in unprecedented devastation and long-lasting global consequences. Understanding their roles is crucial to grasping the complexities of this pivotal historical event and its enduring legacy.

FAQs:

1. Why did the Great Powers have such powerful militaries? The rise of industrialization allowed for mass production of weaponry and the development of advanced military technologies. Nationalism and a belief in military strength fuelled arms races and an expansionist mindset. 2. What role did alliances play in causing the war? The complex web of alliances meant that a conflict between two nations could quickly escalate into a wider war. The system created a domino effect where a declaration of war by one nation triggered declarations by its allies. 3. How did the war impact the Great Powers themselves? The war devastated all the Great Powers, leading to massive loss of life, economic ruin, and profound social and political upheaval. Several empires collapsed as a direct result. 4. What were the main differences between the Central and Allied Powers? The Central Powers were largely a coalition built around Germany's

ambitions, while the Allied Powers were initially a more established alliance driven by a shared goal of containing German aggression. 5. How did the war change the global balance of power? The war led to the decline of the old European empires and the rise of new global powers, particularly the United States, which emerged as a major player on the world stage. The war also created a power vacuum that would be filled by new ideologies and rivalries in the decades to come.
